

**Have you contemplated employing a Practice Nurse?  
Can we help??**

North East valley Division of General Practice offers free services to all GPs and Managers, within our boundaries. This service includes practice visits, training, resources and phone support.

Business case studies have shown how a practice nurse is invaluable. The study demonstrates that the cost of employing a practice nurse is outweighed by the increase in the practices profits by using the practice nurse to organise and contribute to chronic disease management item numbers, assisting in general patient care.

If you are interested in receiving assistance regarding information about practice nursing from the Division in any of the following areas please tick the relevant boxes, fill in your details and fax this form back to the Division on 9496 4349.

**I would like assistance and information on:-**

- How a Practice Nurse can enhance your practice
- Business case for employing a practice nurse
