---

This ‘new’ 2 day workshop will support those nurses who have been working in a medical practice for **up to 12 months**, and are new to the nurse’s role in the general practice setting. Quite often, nurses previously working in different areas eg. the acute setting, are not always competent and confident in the duties, knowledge of care required of the role of practice nurse. The aim of this program is to develop the knowledge and clinical skills of the nurse to assist the General Practitioner to provide comprehensive interventions and population based primary health care within the scope of practice of professional ethical and legal responsibilities. This is a national program that has been developed through the Australian General Practice Network.

---

**Course Dates**

27 – 28 August  
15 – 16 October
